AFRO	WHO African Region
AMRO	WHO Region of the Americas
DFID	United Kingdom Department for International Development
EMRO	WHO Eastern Mediterranean Region
END Fund	The END Fund
GTMP	Global Trachoma Mapping Project
LF	Lymphatic Filariasis
MMDP	Morbidity Management and Disability Prevention
OEPA	Onchocerciasis Program for the Americas
Oncho	Onchocerciasis
OR	Operations research
PC	Preventive chemotherapy
QEDJT	The Queen Elizabeth Diamond Jubilee Trust
SAFE	Surgery, Antibiotics, Facial Cleanliness and Environmental improvements
SCH	Schistosomiasis
SEARO	WHO South-East Asia Region
STH	Soil-Transmitted Helminths
Trach	Trachoma
USAID	United States Agency for International Development
WPF	World Food Program
WPRO	WHO Western Pacific Region

Released June 2016

Background

The Neglected Tropical Diseases Donor Landscape has been initiated by the U.S. Agency for International Development (USAID) and the U.K. Department for International Development (DFID) in response to the growing request from the global Neglected Tropical Diseases (NTD) community to better understand where donor support is provided for Neglected Tropical Diseases that are addressed through Preventive Chemotherapy.

USAID and DFID are both supporters of the World Health Organization's 2020 Goals for the control and elimination of NTDs and the London Declaration on Neglected Tropical Diseases. This document aspires to clarify where major donors are providing financial support to country level programs to advance the WHO 2020 Goals.

Contributing Donors

The following donors have provided data for this version of the Donor Landscape:

The END Fund – is a private philanthropic initiative to combat the five most common neglected tropical diseases (NTDs) that debilitate, blind, disfigure and cause early death to the world's poorest people. Supported by a group of global philanthropists, the END Fund provides financing for nationwide disease control initiatives, creating new programs, supplementing existing ones, and using leveraged funds to extend and deepen impact.

Queen Elizabeth Diamond Jubilee Trust (QEDJT) – is a charitable foundation established in 2012 to mark and celebrate Her Majesty The Queen's sixty-year contribution to the Commonwealth. The mission is to enrich the lives of people from all backgrounds within the Commonwealth by working with partners towards eliminating avoidable blindness and empowering a new generation of young leaders.

United Kingdom Department for International Development (DFID) – is a United Kingdom government department responsible for administering overseas aid. The goal of the department is "to promote sustainable development and eliminate world poverty".

United States Agency for International Development (USAID) – the United States Government agency primarily responsible for administering civilian foreign aid. The agency mission is "to partner to end extreme poverty and to promote resilient, democratic societies while advancing the security and prosperity of the United States".

USAID has gathered and assembled this information on behalf of the contributing donors.

Purpose

This resource highlights through a combination of tables and maps countries benefiting from financial support from major donors for PC-NTD activities. Specifically the NTD Donor Landscape provides donor support by 1) Country, 2) Disease and 3) Complimenting Investments in Operations Research and Morbidity Management and Disability Prevention (MMDP).

Disease Focus

The NTD Donor Landscape focuses on the five Neglected Tropical Diseases that are addressed through Preventive Chemotherapy; lymphatic filariasis, trachoma, onchocerciasis, schistosomiasis and soil-transmitted helminthes.

Program Focus

The NTD Donor Landscape focuses primarily on the core program activities required in country to achieve the control and elimination goals for the PC-NTDs such as disease mapping, planning, drug forecasting, training, IEC, mass drug administration, monitoring, evaluation and surveillance. Support for Operations Research and Morbidity Management and Disability Prevention (MMDP) are reflected in a separate table.

What the Donor Landscape does not provide:

- This is not an exhaustive list of donors, but a first effort to collect information from large scale donors supporting national NTD programs for PC-NTDs.
- The data presented is at the donor level, which in most cases is one level higher than the mechanism or partner providing the support in country. The Donor Landscape does not indicate the mechanism used to provide support in country such as Non-governmental Organizations, direct financial support to Ministries of Health/Finance, or regional mechanism.
- Does not provide the level of funding.

Data Tables & Maps

- **Table 1: PC-NTDs Donor Support by Country, 2015**—indicates donors providing financial support to a country for any PC-NTD related activity for program support (disease mapping, planning, drug forecasting, training, IEC, mass drug administration, monitoring, evaluation and surveillance), Morbidity Management and Disability Prevention and/or Operations Research. The support ranges from targeted (e.g. trachoma disease mapping, dossier development) to large scale (e.g. national integrated mass drug administration) investments.

This information is reflected in the following map:

Map 1: NTD Donors 2015 – All PC-NTD Support

- **Table 2: PC-NTDs Donor Support by Disease, 2015** –indicates the specific disease area(s) a donor is financially supporting in country. The diseases include lymphatic filariasis, trachoma, onchocerciasis, schistosomiasis and soil-transmitted helminthes. Program support includes activities such as disease mapping, planning, drug forecasting, training, IEC, mass drug administration, monitoring, evaluation and surveillance.

This information is reflected in the following maps:

Map 2: NTD Donors 2015 – Support for Lymphatic Filariasis

Map 3: NTD Donors 2015 – Support for Trachoma

Map 4: NTD Donors 2015 – Support for Onchocerciasis

Map 5: NTD Donors 2015 – Support for Schistosomiasis

Map 6: NTD Donors 2015 – Support for Soil Transmitted Helminthes

- **Table 3: Donor Support by Complimenting Investment, 2015**- indicates by country where donors are providing financial support for Morbidity Management and Disability Prevention (MMDP) and Operations Research.

This information is reflected in the following map:

Map 7: NTD Donors 2015 – Support for Morbidity Management & Disability Prevention for Lymphatic Filariasis & Trachoma
